

Heatmap visualization of the 14x14 adjacency matrix for the 'l' graph. The color scale ranges from 0 (white) to 250,000 (dark green). The matrix shows a complex pattern of connections, with higher values (darker green) indicating stronger or more frequent connections between nodes. The diagonal elements are dark green, indicating a value of 250,000 for each node's self-connection.
