

The grid is a 14x14 matrix. The columns are labeled 1 to 14 at the bottom, and the rows are labeled 1 to 14 on the left. The grid is divided into three regions: a blue region on the left, an orange region on the right, and a white region in the center. The blue region consists of the leftmost columns (1-6) and some cells in columns 7-10. The orange region consists of the rightmost columns (8-14) and some cells in columns 7-10. The white region consists of the central columns (3-7) and some cells in columns 1-6 and 8-14.
